Drawing and Document Numbering Procedure

1.0 SCOPE

This job bulletin describes the numbering convention for all document types on the Lilly LP1 project.

2.0 PURPOSE

The purpose of this job bulletin is to document how all project documents should be numbered. This job bulletin will identify the different types of documents utilized on this project and provide guidance on numbering and naming.

3.0 APPLICATION

The conventions defined in this job bulletin apply to the document types listed in the sections below.

4.0 DOCUMENT PROCEDURES

4.1 DRAWINGS (NON-P&ID / AF&ID / PIPING ISOMETRIC)

Drawings (non-P&ID, AF&ID, or Piping Isometric) shall follow the convention outlined below.

Note: Spaces only shown for clarity

LP1XX-ZZ-L_1 L_2 L_3 N_1 N_2 SSS

- Sheet (Section 4.1.6)
- Sub-Sector N_2 (Section 4.1.5)
- Sector N_1 (Section 4.1.4)
- Level L_3 (Section 4.1.3)
- Level L_2 (Section 4.1.2)
- Level L_1 (Section 4.1.1)
- Lilly GECMS Drawing Code (Attachment 1)
- Building Number (Section 4.7)

Copyright © 2019, Fluor Corporation. All Rights Reserved.

4.1.1 LEVEL (L_1)

Identifier	Description
0	Outside or General
1	1st Floor
2	2nd Floor
3	3rd Floor
4	4th Floor
5	5th Floor
6	6th Floor
N	nth Floor

4.1.2 LEVEL (L_2)

Identifier	Description
0	General (Default)
5	Half Level

4.1.3 LEVEL (L_3)

Identifier	Description
0	General (Default)
B	Basement
M	Mezzanine
N	Interstitial
P	Penthouse
R	Roof
U	U/G

4.1.4 SECTOR (N_1)

The following applies to plan drawings and does not apply to Civil drawings.
Each building will be broken up into sectors for larger plans. Overall plans will be sector 0.
Major sectors 1, 2, 3, 4, n will represent 1/8" scale drawings.

Copyright © 2023, Fluor Corporation. All Rights Reserved.

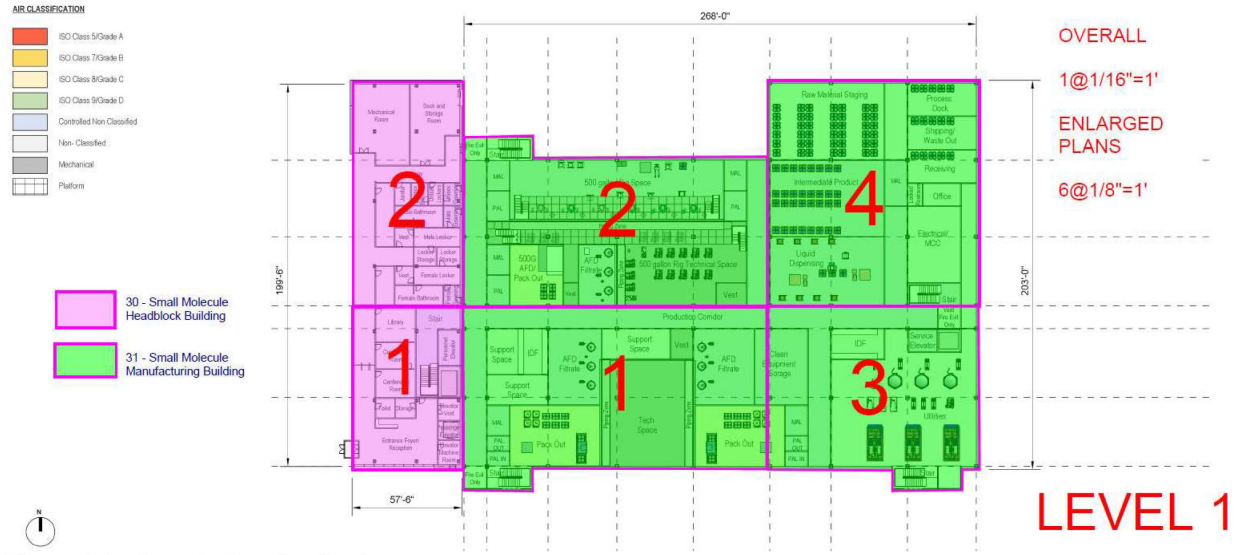

Figure 4-1 - Sample Drawing Sectors

4.1.5 SUB-SECTOR / ADJACENT SECTOR (N_2)

This following applies to plan drawings and does not apply to Civil drawings.
Each sector will be broken up into four (4) sub-sectors for exploded plans (e.g., ¼' scale drawings). Overall plans will be sub-sector 0. Sub-sectors will typically be A, B, C, D. In some instances, more granular detail may be needed. For any partial plans that require larger than ¼" scale, can use the sub-sector code of P.

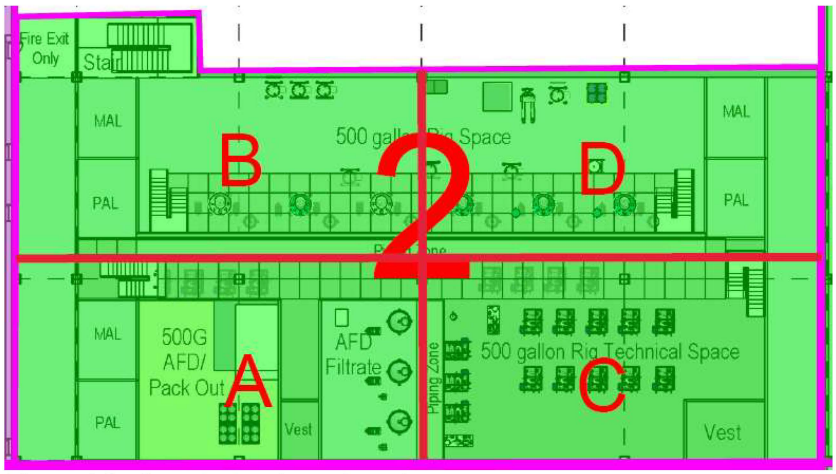

Figure 4-2 - Sample drawing sub-sectors

Depending on the nature of the information to be conveyed in the drawing, some flexibility is needed with the use of sectors.

Copyright © 2023, Fluor Corporation. All Rights Reserved.

In cases where a larger scale is required, we can utilize the sub-sector. The sub-sector gives us the option to divide the sector into quadrants for 1/4 scale drawings or the option for a more flexible partial plan within a sector. See section 4.1.5.1

In cases where multiple sectors need to be shown, we can use N_1 and N_2 to define the range of the sectors to be shown within the drawing. See section 4.1.5.2.

4.1.5.1 SUB-SECTOR

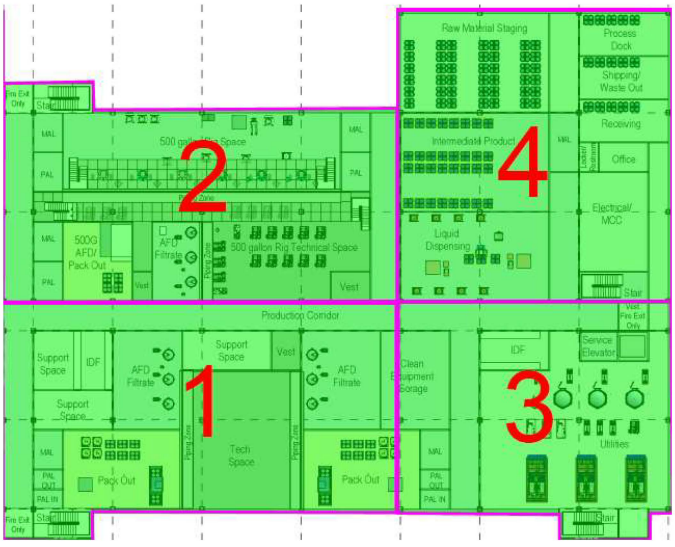
Drawings requiring larger scale or partial plan can utilize a sub-sector

Identifier	Description
0	No sub sector
A	Upper Left
B	Upper Right
C	Lower Left
D	Lower Right
P	Partial plan within a sector

4.1.5.2 ADJACENT SECTOR

Drawings which require multiple sectors can utilize adjacent sector and can use the following convention for N_1 and N_2.

N_1 First Sector (lower number)
N_2 Last Sector (higher number)



Using the sample key plan above, if we wanted to develop a drawing which includes multiple sectors:

- *Sectors 1 and 3:*
  - *LP131-MP-100**13**000 SM 1st floor mechanical piping plan sectors 1 and 3.*

Copyright © 2023, Fluor Corporation. All Rights Reserved.

- *Sectors 3 and 4:*
  - *LP131-MP-10034000 SM 1st floor mechanical piping plan sectors 3 and 4.*

4.1.6 SHEET NUMBER

This is the last number that we can use to make the full drawing number unique. We will group drawings of similar types using the sheet number. Typical ranges are below. If the Lilly GECMS code would be used by more than one Fluor discipline, we will sub-divide the sheet ranges. An example of a split is shown below.

Drawing Type	Sheet Number Range
Plans / General	**000 – 499**
Split 1	*000 – 249*
Split 2	*250 - 499*
Elevations	**500 – 599**
Split 1	*500 – 549*
Split 2	*550 - 599*
Other**	**600 – 799**
Split 1	*600 – 699*
Split 2	*700 - 799*
Schedules	**800 – 899**
Split 1	*800 – 849*
Split 2	*850 - 899*
Details, Sections	**900 – 999**
Split 1	*900 – 949*
Split 2	*950 - 999*

SAMPLE

** Examples: Riser and Block Diagrams

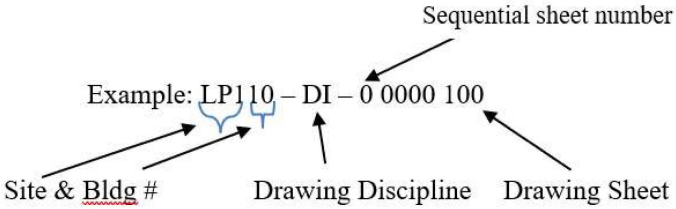
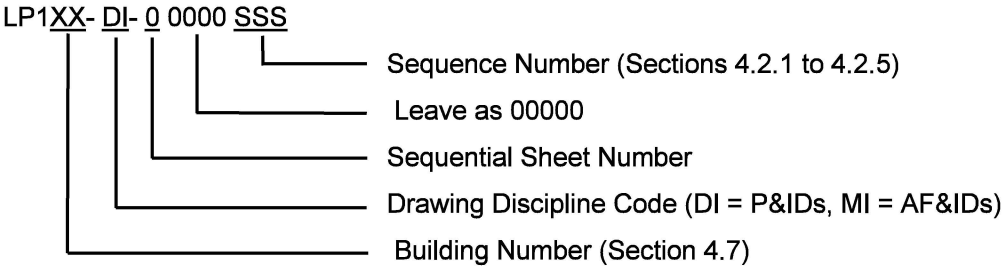
4.2 P&IDs and AF&IDs

P&ID drawings should follow the Lilly standard (Attachment 1). Specifically, refer to section three and appendix six of the document Lilly Grasslands Drawing Identification and Tagging attached to this job bulletin.



Note: Spaces only shown for clarity



Drawing Sheets shall be grouped as follows:

4.2.1 Small Molecule

Series	Area
000-099	Not Used
100-199	Rig #1
200-299	Rig #2
300-399	Rig #3
400-499	Shared Process Systems
500-599	Not Used
600-699	PWEC
700-799	GMP Distributed Material
800-899	Non-GMP Distributed Utility
900-999	Waste Treatment
1000-1099	HVAC

4.2.2 Peptide

Series	Area
000-099	Distribution Headers/Common Buffers
100-149	Synthesis 1 - Step 1
150-199	Synthesis 1 - Step 2

Copyright © 2023, Fluor Corporation. All Rights Reserved.
Form 000.100.F0629 (15Sep2009)

Series	Area
200-249	Synthesis 1 - Step 3
250-299	Synthesis 1 - Step 4
300-349	
350-399	
400-449	
450-499	
500-599	
600-699	Purification – Dissolve/Reverse Phase
700-799	Purification – Precipitation/Drying
800-899	Plant Utilities
900-999	Waste Treatment
1000-1099	HVAC

4.2.3 Oligo – Removed

4.2.4 Tank Farm/Solvent Recovery

Series	Area
000-099	Distribution Headers
100-199	
200-299	
300-399	
400-499	
500-599	
600-699	
700-799	
800-899	Plant Utilities
900-999	Waste Treatment
1000-1099	HVAC

4.2.5 CUB

Series	Area
000-099	Distribution
100-199	Water Pretreatment and BFW
200-299	Steam
300-399	Nitrogen
400-499	Compressed Air
500-599	Process / HVAC Cooling Water
600-699	
700-799	HVAC Chilled Water
800-899	Misc.
900-999	HHW, Tepid Water, and Potable Water
1000-1099	HVAC

Copyright © 2023, Fluor Corporation. All Rights Reserved.

4.2.6 Admin Lab

Series	Area
000-099	Distribution Headers
100-199	QC Lab
200-299	Refrigerators / Freezers
300-399	TSMS Lab
400-499	
500-599	
600-699	
700-839	Waste/Waste Collection
840-899	Plant Utility
900-999	
1000-1099	HVAC

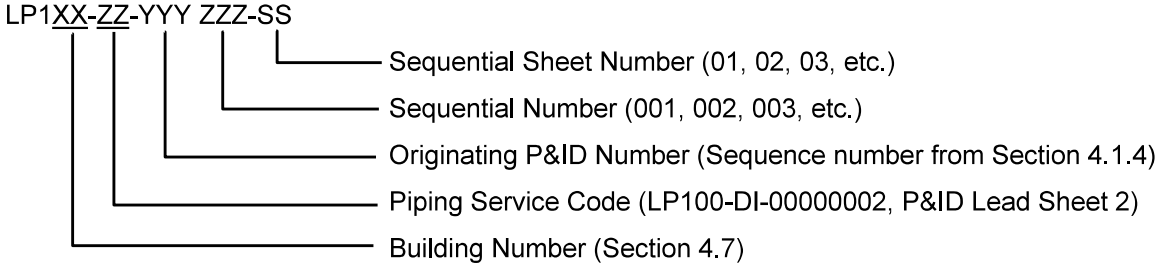
4.2.7 Warehouse

Series	Area
000-099	Distribution Headers
100-199	Weight and Dispense/Sampling
200-299	Cold Room/Refrigerators/Freezers
300-399	Pallet Washer/Inverter
400-499	
500-599	
600-699	
700-799	
800-809	Waste Collection
810-999	Plant Utility
1000-1099	HVAC

4.3 PIPING ISOMETRICS

Piping isometrics shall follow the convention outlined below.

Note: Spaces only shown for clarity



Copyright © 2023, Fluor Corporation. All Rights Reserved.

4.4 EHT ISOMETRICS

Electrical Heat Trace isometrics shall follow the convention outlined below.

Note: Spaces only shown for clarity

LP1XX-ET-ZZ-YYY ZZZ-SS

- SS – Sequential Sheet Number (01, 02, 03, etc.)
- ZZZ – Sequential Number (001, 002, 003, etc.)
- YYY – Originating P&ID Number (Sequence number from Section 4.1.4)
- ZZ – Piping Service Code (LP100-DI-00000002, P&ID Lead Sheet 2)
- ET – EHT Isometric Identifier
- XX – Building Number (Section 4.7)

4.5 SPECIFICATIONS

Specifications will be taken from Lilly and have a Fluor standard cover sheet added. The Specification Number will follow the convention below. If there is a need to write an original specification to fill a gap, Lilly will provide a number that matches their convention first and then the following will be prepended. The Specification Template contains both the coversheet, revision history, and specification structure (Attachment 5).The template is located in SharePoint 000_General/Templates. When revising a Lilly specification, the coversheet and revision log should be added to the specification also note that there is a footer that needs to be updated. The project specific version number entry should follow the Document Revision Numbering Procedure JB-08-0004 job bulletin. For original specifications, the project specific version number and the version number entries will have the same value.

LP1XX- TTT- LLLxLL

- LLLxLL – Lilly Specification Number (variable length; includes EMS-)
- TTT – Discipline Code (Section 4.8)
- XX – Building Number (Section 4.7)

4.6 ALL OTHER DOCUMENTS

All other documents will follow the formula below. Tables for Fluor discipline code, and building numbers are provided. The PDDM document code can be found in the document 000.200.6660 attached to this job bulletin.

LP1XX- TTT- DDD-SSS

- SSS – Sequence Number **see exception*
- DDD – Doc Code (Attachments 2, 3, or 4)
- TTT – Discipline Code (Section 4.8)
- XX – Building Number (Section 4.7)

Copyright © 2023, Fluor Corporation. All Rights Reserved.

Sequence Number Criteria
Must be 3-digit number (000-999) *See exceptions below

Exceptions:

1. *Equipment datasheets will use equipment tag number, without building number or dashes, in place of a sequence number (e.g., TK2311)*
2. *Technical procurement package information will use the package number without dashes (e.g., 40201).*
3. *Technical contract information will use the contract package number followed by a two-digit sequence number (e.g., K001-43)*
4. *Instrument datasheet lists will be comprised of: first, a 4 digit SPI form number for the instrument type, then the last 4 digits of the 7-prime PO number, and lastly a three digit sequence number. Whenever there is more than one node in any particular area or building, such as but not limited to, PP1, SA1, and SB1, node lists must have unique sequence numbers for their node. (e.g. LP111-270-LST-1101-0014-001 could be the sequence number for the PP1 Datasheets Orifice Plate Non-Hygienic while LP111-270-LST-1101-0014-002 could be the SA1 Datasheets Orifice Plate Non-Hygienic).*
5. *Pressure relief calculations will use either relief device number(s) or equipment tag number(s) of the protected equipment, without building number in place of the sequence number (e.g. LP111-225-CAL-PSV2381JC/D/E). Additional identifiers such as "_SHELL", "_TUBE", "_JACKET" may be added to the document number when an equipment tag is used to specify the exact overpressure protection location the calculation is covering.*

Note: The same sequence number may be used for each document as long as the full document number is unique. Ex. LP111-225-DBD-006 and LP131-225-DBD-006

4.7 BUILDING NUMBERS AND WBS CODES

Building Number	Description	WBS Node ID
00	General	GEN
	Site	STE
10	Peptide Synthesis/Purification Headblock Building	PHB
11	Peptide Synthesis/Purification Manufacturing Building 1	PP1
11	Peptide Synthesis A Manufacturing Building 1	SA1
11	Peptide Synthesis B Manufacturing Building 1	SB1
12	Peptide Synthesis/Purification Building 1 E-Building 1	PP1
13	Peptide Synthesis/Purification Building 1 E-Building 2	PP1
16	Peptide Synthesis/Purification Manufacturing Building 2	PP2
17	Peptide Synthesis/Purification Building 2 E-Building 1	PP2
18	Peptide Synthesis/Purification Building 2 E-Building 2	PP2
30	Small Molecule Headblock Building 1	SMM
31	Small Molecule Manufacturing Building 1	SMM
32	Small Molecule Manufacturing E-Building 1	SMM

Copyright © 2023, Fluor Corporation. All Rights Reserved.

Building Number	Description	WBS Node ID
35	Small Molecule Headblock Building 2	SM2
36	Small Molecule Manufacturing Building 2	SM2
37	Small Molecule Manufacturing E-Building 2	SM2
40 – 49	Tank Farm E-Buildings	Various
50	Central Utilities Building (CUB)	CUB
51	Main Switchgear Building	CUB
52	CUB Cooling Tower E-Building	CUB
53	Modular Data Center (BY LILLY)	STE
55	Fire and Rescue Center	SPG
56	Fire Pump Building	CUB
58	Truck Entrance Guardhouse	STE
60	Warehouse	WHS
61	Warehouse Freezer Building	WHS
65	Waste/Recycling Center	SPG
67	Rail Spur Operators Building	STE
70	Administrative/Laboratory Building	ALB
75	Welcome Center	SPG
Y	Exterior processes/systems	TFS
Y	Site Wide Facilities – Fire Water Tank	CUB
Y	Sanitary Sewer – Lift Station/Metering Station	STE

4.8 DISCIPLINE CODES

Code	Discipline
000	General Engineering (common or multi-discipline)
042	QA
100	Project Management
200	Engineering Management
210	Civil Engineering
215	Structural Engineering
220	Architectural
225	Process
235	HVAC
240	Plumbing
250	Piping Engineering
255	Mechanical Engineering
265	Electrical
270	Control Systems
275	Security, IT, Fire Alarm

Job Bulletin JB-08-0001

Rev. No.	Date	Description / Changes Incorporated
4	7Feb24	Updated to include the Site Wide facilities & Sanitary Sewer in Section 4.6 Building Numbers and WBS Codes; Added P&ID's & AFID's drawings sheets grouping, Section 4.2.6 Admin lab and Section 4.2.7 Warehouse.
5	13Mar24	In Section 4.6 "FUTURE" comment was deleted from SB1, removed PP2, SA2, and SB2 rows. Changed Welcome center from STE to SPG. In Section 4.2.2 Synthesis 2 was removed from series numbers.
6	04April24	Section 4.3 Piping service code changed to LP100-DI-00000002.
7	10Apr24	Section 4.2.6 ALB HVAC Series Drawing Sheet Updated Section 4.2.7 WHS HVAC Series Drawing Sheet Updated Section 4.6 Building Number 51 Description Updated
8	1Aug24	Section 4.1.6 Noted the table numbering scheme is a Sample only. Removed Section 4.2.3 for Oligo P&ID/AF&ID numbering table. Section 4.5 Added sequence number exception to be used for instrument datasheet lists. Section 4.6 Removed Oligo Building Numbers. Added Peptide Building 2 and Small Molecule 2 Building Numbers.
9	8Aug24	Section 4.6 Added Building 52 for CUB Cooling Tower E-Building
10	07Oct24	Section 4.6 Added Building 58 & 67 for STE. Updated Attachment 2 to include 275-CON-001 Doc Type which has been adopted by the project from the 08 Aug 2024 revision of 000.200.6660.
11/12	20Nov24	Section 4.5 Added exception for Relief Device Calculations.
13	18Jun25	Updated Section 4.6 for SMM building codes to have the building number 1 or 2 at the end of the building name.
14	30Jun25	Added Section 4.4 for Numbering of EHT Drawings

Copyright © 2023, Fluor Corporation. All Rights Reserved.
